CHNI Policy, Information & Research Bulletin

Issue 6: Homelessness Statistics 2005-2006*

** comparative data: 2004-2005*

Welcome to issue 6 of CHAINMAIL, CHNI's electronic based information bulletin being circulated to our members.

This special issue of CHAINMAIL focuses upon **Homelessness data for the period 2005-2006, as calculated by NIHE**. These data will be displayed against last year's analyses (2004-2005) for purposes of comparison.

These data are merely presented for purposes of information. No further interpretation of the data is attempted. Similarly, as the data have not been refined in any way, errors relate to primary data handling. Queries regarding the nature of the primary source data should be directed to the NIHE. All other queries or suggestions can be directed to George Quinn, Information Officer, CHNI, tel: 02890 246 440, email: info@chni.org.uk. Similarly, for comparative data (2004/05) for appendices 3 & 4, contact George as above.

Note re. tables: +/- change (n) refers to the increase / decrease in actual numbers when comparing the period 2005-2006 against 2004-2005. **% change** refers to the percentage increase or decrease.

(a) Where an entry is a minus value, this indicates a percentage or numerical decrease. Values without a minus sign indicate an increase. This applies to all subsequent tables. (b) Where a table is accompanied by “NIHE Note”, this refers to notes accompanying the primary source data. As such these are NIHE comments.

Some data will not tally with yearly totals of presenters, because decisions can be made for presenters who originally presented the previous year.

Table 1: Total numbers presenting to NIHE, and those meeting legislative criteria (Full Duty Applicant, FDA): 2004-05 & 2005-06 compared

	2004-2005	2005-06	+/- change (n)	%change

Not Homeless	4,549	5,831	1,282	28.18
Intentionally Homeless	4,383	4,698	315	7.19

NIHE Notes: i. This table shows the actual numbers of cases presenting decided as FDA, or considered “Not Homeless”, within the year –Not an analysis of the outcomes for those presenting. ii. The data will not match yearly totals of presenters, because there can be back keying, i.e. Decisions can be made to presenters who originally presented the previous year
